

# Repairing Pallets?

## Your Business needs one of these!

A shortage in supply due to high global demand and high prices for new timber has resulted in increased production of repaired **EURO/EPAL/CHEP** pallets.

There has never been a more important time to invest in pallet repair equipment.

Here are **7** compelling reasons for investing in the **Pneumatico WT2 Pallet Repair Table**.

### 1 - It's all about Increasing Productivity and Profitability

Repairing pallets quickly and efficiently is essential to for reducing costs and improving margins. The low cost WT2 Repair Table is a high quality and robustly built product, designed to speed up repairs, critical to this labour intensive process.

### 2 - Designed for the Industry, by the Industry

Using information and feedback from experts in the pallet industry, and operators who repair pallets daily, the WT2 was designed to meet their demands. The WT2 is ergonomically designed and solidly constructed, incorporating all the features to make pallet repairs comfortable, productive and safe.

### 3 - Workplace Safety

Amongst the most common workplace injuries are sprains and muscle strains which occur most when carrying out physical work such as handling heavy pallets.

The two most requested design features incorporated into the Table are the **Trough** and **Pneumatic Lift**. These features are designed to reduce strain, and to minimise the risk of injury when flipping and rotating pallets.

### 4 - Creating a Greener Environment

Quality repairs and recycling goes a long way to protecting the environment, by reducing the carbon footprint created from processing natural resources, as well as preventing timber waste ending up in landfill sites.

The WT2 was created to meet the demand for a worktable which simplifies and speeds up repairs safely and cost effectively.

## 5 - Ease of Use

The WT2 was designed for ease of use by one operator, with all the required tools conveniently stored either on, or attached to the unit.

## 6 - A workplace Winner

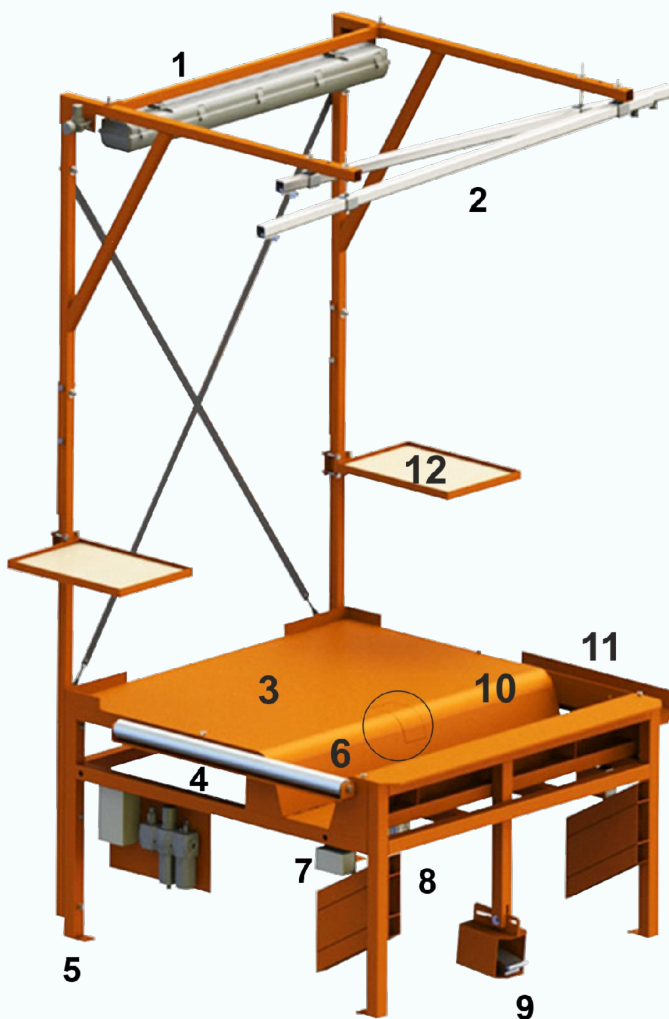

Successful businesses need to be equipped with the right people and equipment to manufacture their products. Investing in the WT2, creates a professional and organised workplace where staff know where, and how, to carry out their work.

## 7 - Return on Investment

The Repair Table typically pays for itself in as little as 6-12 months, due to the volume of repairs made possible by the system. With a working life of well over 10 years, it is an essential investment for any pallet repair business.

## The WT2 Pallet Repair Table Features Explained

**1. LED Light** – Bright LED lighting illuminates the work table for a safe and well lit working environment .

**2. Angled Rails** – There are two rails to support two nail guns. The angled rail allows the guns to be moved easily, and retracts them automatically from the work area when not in use.

Attached to each rail are **Balancers** which support the weight of the nail gun allowing for prolonged production without fatigue and strain.

**3. Work Table** – Constructed from 8mm thick steel, the WT2 is suited to the harshest of working conditions.

**4. Transport Roller** – Designed to roll and support the weight of the pallet as it is loaded onto the Table.

**5. Electric Box and Air Regulator** – The Electric Box requires power and feeds the LED light and plug sockets. Adjacent is the Air Regulator and Compressed Air connector, required for the nail guns and Pneumatic Lift. Both of these units are conveniently recessed under the table to avoid exposure to damage.

**6. Trough** – Ergonomically designed to allow pallets to be flipped with ease.

**7. Twin Power Socket** – The sockets are located on either side of the table to feed electrically powered sabre saws.

**8. Tool Storage Rack** – There are two racks mounted on the front legs of the Table for easy access to tools such as hammers.

**9. Foot Pedal** – When pressed raises the Pneumatic lift to allow the pallets to be rotated with minimal effort, and is positioned on the floor for easy accessibility.

**10. Pneumatic Lift** – By pressing the Foot Pedal, the Pneumatic Lift is actuated raising the pallet and allowing it to be rotated with ease.

**11. Sabre Saw Cradle** – Handy storage shelf for the Sabre Saw.

**12. Storage Shelves** – Detachable shelves for storing tools and replacement nail gun coils.
